Summary

Computer Science undergraduate specializing in Artificial Intelligence with experience in software development, backend engineering, machine learning, and full-stack application development. Skilled in building REST APIs, developing data-driven applications, and working with modern development tools and frameworks.

Education

Amrita School of Engineering, Amritapuri 2023 – Present
B.Tech in Computer Science and Engineering (Artificial Intelligence) | CGPA: 8.38/10
Relevant Coursework: Machine Learning, Deep Learning, Reinforcement Learning

Experience

Backend Developer Intern, XMinds Infotech

- Developed and tested backend services and REST APIs for web applications.
- Implemented backend features and enhancements based on project requirements in collaboration with senior developers.
- Debugged, tested, and optimized backend services to improve application reliability and performance.

Projects

Multimodal Political Meme Classification Apr 2026 – Jul 2026

- Developed a multimodal classifier integrating Malayalam-BERT and Swin Transformer for political meme classification.
- Evaluated 9 fusion strategies, improving macro F1-score by 28.1% through minority-class augmentation.
- Built an end-to-end PyTorch training pipeline with hierarchical fusion and 5-fold cross-validation, achieving a 0.5218 macro F1-score.

Technologies: PyTorch, Hugging Face, Swin Transformer, Malayalam-BERT

NutriScan – AI Nutrition Analysis Apr 2026 – Jun 2026

- Developed a full-stack MERN application that analyzes food images using the Gemini API to estimate nutritional values and provide personalized dietary insights.
- Engineered RESTful APIs with Node.js and Express.js for user authentication, meal history management, and nutrition data processing, with MongoDB for persistent data storage.
- Built a responsive React.js interface with real-time nutrition analysis, backend integration, and interactive dashboards for meal and nutrition tracking.

Technologies: React.js, Node.js, Express.js, MongoDB, Gemini API

Skills

Languages: Python

Computer Science: Object-Oriented Programming, DBMS

AI / ML: Machine Learning, Deep Learning, Computer Vision, Natural Language Processing

Tools: Git, GitHub, Jupyter Notebook,

Certifications

Data Analyst – Big 4 Ready – OneRoadmap [Link] | **McKinsey Forward Program – McKinsey & Company** [Link]

Activities

Coordinator – Non-Tech Committee, Vidyut National Level Multifest, Amrita Vishwa Vidyapeetham

- Coordinated the Candlelight Concert event attended by 200+ participants during the Vidyut multifest.
- Assisted in organizing and managing multiple fest activities and events.

Interests

Artificial Intelligence | Computer Vision | Agentic AI | Reinforcement Learning
